

SATELLITE SYMPOSIUM

The Patient Journey:

From symptom onset to potential new treatment horizons in hereditary ATTR amyloidosis with polyneuropathy (hATTR-PN)

Chairman: Giuseppe Vita, MD (Italy)

Faculty: Michelle Mezei, MD (Canada)

P James Dyck, MD (USA)

Alejandra Gonzalez Duarte, MD (Mexico)

Objectives:

- Describe the patient journey and unmet medical needs in hATTR-PN
- Review the natural history and clinical assessment tools in hATTR-PN
- Discuss the development of RNAi therapeutics as a potential treatment option for patients with hATTR-PN

Thursday, July 7, 2016 | 17:15-18:15
Osgoode Ballroom West

This presentation was approved by the Program Committee as an independent, non-accredited activity held in conjunction with the 14th International Congress on Neuromuscular Diseases (ICNMD). This presentation is not sponsored or endorsed by ICNMD 2016.
